Term of Apprenticeship.

1. The term of apprenticeship shall be established by the Illinois Laborers' & Contractors Joint Apprenticeship & Training Program Trustees (ILCJATP) of on the job diversified work and training, excluding time spend in related instruction.

When credit is granted, the remaining term of apprenticeship shall be reduced. The term may also be reduced by the ILCJATP for individual apprentices demonstrating exceptional skill and technical knowledge competencies in any module or major component of the work process.

2. Probationary Period The first **500** hours of employment for all entering apprentices, without respect to any advanced standing awarded, shall constitute a probationary period which shall be a part of the term of apprenticeship. During the probationary period the Apprenticeship Agreement may be terminated by the committee or apprentice without stated cause or hearing. After the probationary period, the agreement may be cancelled at the request of the apprentice, or may be suspended, cancelled, or terminated by the sponsor, for good cause, with due notice to the apprentice and a reasonable opportunity

for corrective action, and with written notice to the apprentice and to the registration agency of the final action taken.

3. Apprentice Wages and Wage Progression Apprentices shall be paid a progressively increasing schedule of wages consistent with skills and knowledge acquired. The rate for each period of the apprenticeship is expressed as a percentage of the skilled Construction Craft Laborer journeyworker rate specified in the collective bargaining agreement. The approximate time interval for each period is indicated; it may be adjusted for individual apprentices progress. Such adjusted periods may be made only by ILCJATP action.
4. The apprentice rate shall be based on the appropriate percent of the journeyworker rate of the collective bargaining agreement. Full fringe benefits as stated in the collective bargaining agreement will be paid on all current and future apprentices enrolled in the apprenticeship program. Employers will be required to make fringe benefit contributions upon employment of any apprentice.
5. Ratio, Supervision, Safety

One (1) journeyworker to one (1) apprentice on a two (2) worker job;
One (1) apprentice to two (2) journeyworkers on a three (3) worker job;
Two (2) apprentices to four (4) journeyworkers on a six (6) worker job;
Three (3) apprentices to nine (9) journeyworkers on a twelve (12) worker job;
Four (4) apprentices to twenty-five (25) journeyworkers;
Five (5) apprentices to thirty-five (35) Journeyworkers, and
Once (1) apprentice to twenty (20) journeyworkers thereafter.

Apprentices shall work under the supervision of competent and qualified laborer journeyworkers on the job. Instruction in safety and safe work practices will be a part of the job instruction and addition to that included in related instruction and in special off-job courses.

6. The work of the Construction Craft Laborer occupation is diverse; therefore, care must be taken by the ILCJATP to ensure that the families of tasks and groups of job skills are organized so that the ILCJATP can track the experience and training received by the apprentice. Appendix A is the schedule of work processes.

While modifications may be required from time to time to accommodate the type of construction work available in the area, apprentices are encouraged to gain experience in all of the commonly accepted major industry divisions. The three industry divisions are: (a) environmental remediation, (b) building construction, and (c) heavy/highway construction. It is to be noted that the skills used are not necessarily discrete to one grouping.

The ILCJATP Trustees will identify those skill groups most important to success at the journeyworker level in the locality in which the program operates. The ILCJATP will plan rotation and off-site instruction to meet those particular requirements.

Participation by the apprentice in off-job and skill center manipulative skill training is particularly relevant to rounding out the skills acquired as noted above. It is the only viable alternative in dangerous, hazardous work. Moreover, the time spent in this form of tutoring skills is almost totally 100% training time as contrasted with the reverse in normal work time with its focus on productive output. It is for this reason the ILCJATP may give added value to the time spent in such controlled training environments when determining the completion of a major component of the work processes and group of skill modules.

ENTIRE AGREEMENT OF PARTIES

Section 1. This represents the entire Agreement of the Parties. The Employer understands that the Union is a fraternal society and as such and in keeping with the provisions of the Labor Management Relations Act of 1947 as amended, has the right to prescribe its own rules and regulations with respect to any other matters for its own use. However, such rules or regulations whether contained in the bylaws, constitution, or otherwise, shall have no effect, directly or indirectly, upon this Collective Bargaining Agreement, any employment relationship or the relationship between the parties.

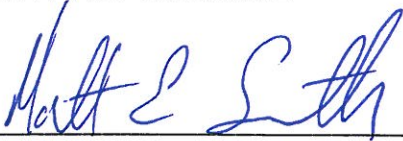

Section 2. Individual contractors signatory hereto who are not members of said Association agree to be bound by any amendments, extensions or changes in this Agreement agreed between the Union and the Association, and further agree to be bound by the terms and conditions of all subsequent contracts negotiated between the Union and the Association, unless ninety (90) days prior to the expiration of this or any subsequent agreement, the non-member contractor notifies the Union in writing that it revokes such authorization. Further, said non-member contractor agrees that notice served by the Union upon said Association and Mediation Service for reopening and termination or commencement of negotiations shall constitute notice upon and covering the nonmember contractor's signatory hereto.
